Rigores water district

Rigores water district:

- | | |
|----------------------------------|--------------------------------|
| • September the 18 th | 45 houses, 140 people |
| • Rigores | 474 houses, 3685 people |
| • Ilanga Viejo | 239 houses, 738 people |
| • Las Uvas | 27 houses, 91 people |
| • Nueva Vida | 87 houses, 346 people |
| Total in Rigores w.d. | 872 houses, 5000 people |
- The project encompasses 20 sq. kms.

Current Rigores system

- Constructed in 2006
- Serves 8 communities
- Consists of dam, sediment filter, pipeline, storage tank and distribution line

Problem with existing system

- 6 of the communities as well as Ilanga Nueva do not have problems with the current system
- However, Ilanga Viejo, Rigores and September the 18th only receive water every 2 days, some areas every 4 days particularly during the summer. 2 neighborhoods are not connected to the system. The new system will serve these 5 communities.

- There are ten 20 foot deep hand pumps in the community. Nueva Vida also uses a pond for cleaning clothes.

Rigores water project proposal

• 1. Drill a new well, 350'	\$25,715.00
• 2. Submersible well pump	\$22,000.00
